

## POWER BRITE™

### CONCENTRATED ACID WHEEL CLEANER (1060)

#### DESCRIPTION

Power Brite™ Concentrated Acid Wheel Cleaner is an extremely powerful concentrate containing premium solvents and strong mineral acids. Power Brite is intended solely for the cleaning and restoration of chrome-plated surfaces. Due to the large variety of chrome-plated wheels available in the U.S., both the manufacturer and its distributors make no warranty of fitness or suitability of this product to any given task. Please review the SDS for all safety precautions related to this product.

#### DIRECTIONS

DIRECTIONS: FOR PROFESSIONAL USE ONLY. READ SAFETY PRECAUTIONS. Minimum dilution of 1:1 with water in a spray bottle. Can be diluted up to 1:10.

Add Power Brite to water. Spray mixture directly onto wheel surface. Test one wheel prior to application to see if spotting or streaking occur. Do not use product if spotting or staining occurs. Do not spray product directly on plastic wheel centers or trim. USE ON ONLY ONE WHEEL AT A TIME. Do not let dwell for more than 30 to 60 seconds. Light rubbing with a brush aids in removal of heavy deposits. Rinse surface with high-pressure water. For stubborn soils, repeat as necessary. DO NOT USE ON ALUMINUM OR MAGNESIUM WHEELS. Malco or its distributors will not accept responsibility for damaged wheels resulting from either intentional or accidental misuse of this product.

#### FEATURES & BENEFITS

**High-strength mineral acid blend.**  
Rapidly dissolves heavy brake dust, baked-on road grime and surface rust-cutting cleaning time in half.

**Short dwell time (30–60 sec).**  
Accelerates throughput in high-volume shops-wheels go from dirty to rinse-ready in under a minute.

**Fast-rinse, non-foaming formula.**  
Drains and shears off quickly under pressure, reducing rinse-cycle time and minimizing water usage

#### PACKAGE SIZES

**4 – 1 Gallon**  
Part number: 106001

**5 Gallon**  
Part number: 106005
