

MALCO[®] FAST SHOT WHEEL & TIRE CLEANER NON-ACID FORMULA (1880)

DESCRIPTION

Fast Shot is an extremely powerful, non-acid wheel cleaner designed to remove dirt and baked-on brake dust from coated aluminum and alloy wheels. This clinging formula works quickly and makes wheels look bright again.

DIRECTIONS

Directions: DO NOT USE ON HOT WHEELS. Test in an inconspicuous area prior to application. Do not use product if spotting or staining occurs. Do not apply to bare aluminum, magnesium, anodized, plastic, or powder coated surfaces. Spray product directly onto wheels and tires. Clean only one wheel at a time, let the solution dwell for up to two minutes and rinse away brake dust and dirt. DO NOT LET THE PRODUCT DRY. For heavy soils, agitation with a wheel or tire brush may be necessary to loosen soils. Malco will not accept responsibility for damaged wheels and tires resulting from either intentional or accidental misuse of this product.

FEATURES AND BENEFITS

Will not clump when frozen	Safe for use on coated aluminum and alloy wheels
Acid-free formula has a better safety profile compared to HF wheel cleaners	Cleans tires at the same time
Dissolves and loosens baked-on brake dust, grease, oil and dirt	Restores the clean look of tires and leaves wheels bright and shiny

PACKAGE SIZES

- 1-gallon: (Part number: 188001)
- 5-gallon: (Part number: 188005)
- 55-gallon: (Part number: 188055)

PRODUCT FAQs

Q1: Can I use Fast Shot Wheel & Tire Cleaner on chrome and painted wheels?

A1: Fast Shot is not recommended for chrome or painted wheels. **DAMAGE MAY OCCUR!** It is always best to test in an inconspicuous area.

Q2: Since Fast Shot is non-acid, do I need safety protection?

A2: Fast Shot is safer than HF cleaners, but safety protection for eyes and skin is recommended.

Q3: Will Fast Shot clump and clog my spray nozzle when it is frozen or near frozen?

A3: No, Fast Shot can be frozen and thawed, and will not clump or become difficult to use.
